

# AGENT AI CASH

(AAIC)

AI-Powered Financial  
Ecosystem on Base

VERSION 1.0 | WHITEPAPER 2026

# EXECUTIVE SUMMARY

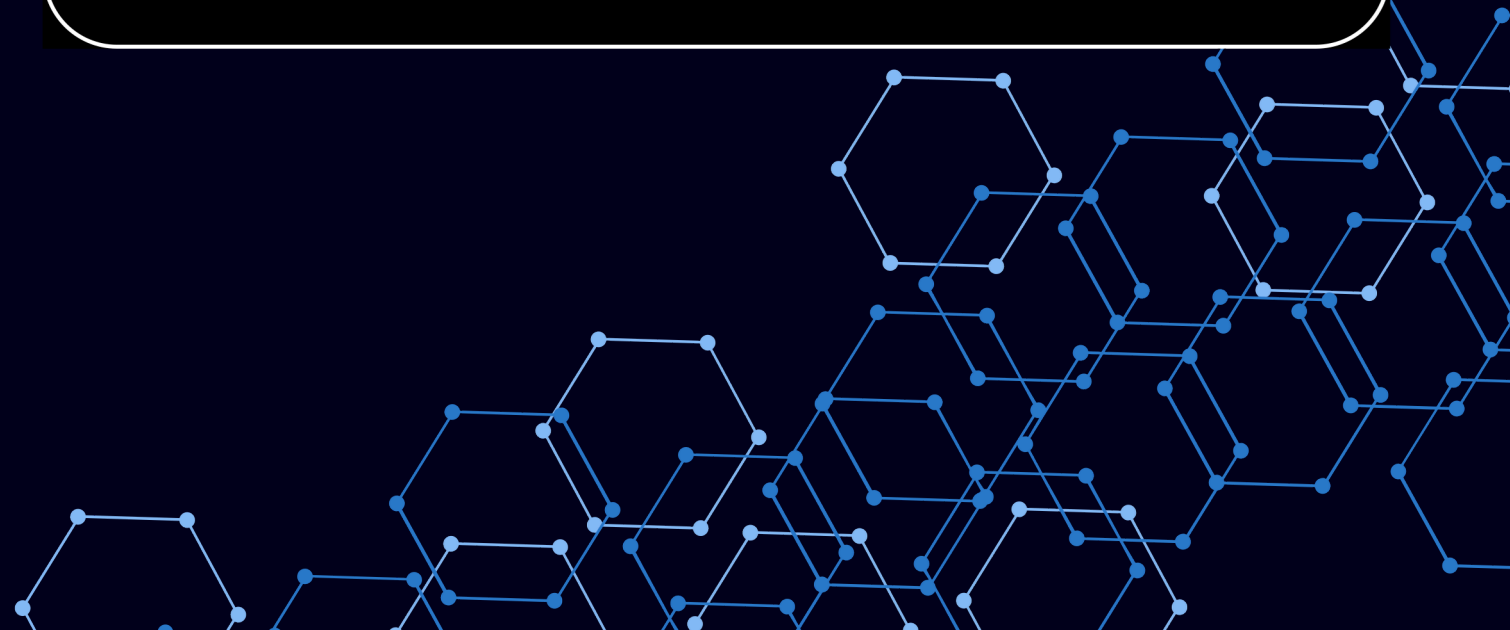

Agent AI Cash (\$AAIC) is the ultimate financial layer engineered for the decentralized AI economy and borderless daily commerce. Operating natively on Base Chain, \$AAIC bridges ultra-efficient blockchain mechanics with intelligent, real-time AI processing. By combining high-throughput layer-2 execution with an advanced multi-chain smart wallet, \$AAIC empowers retail users, traders, and autonomous agents to manage, trade, and spend crypto seamlessly as instant fiat currency across both digital and physical worlds.

# VISION & MISSION

Vision: To build a borderless financial ecosystem where crypto and fiat blend invisibly, powered by intuitive AI that protects, grows, and mobilizes user wealth in real time.

Mission: To deliver a powerhouse multi-chain wallet that translates complex market data into profitable AI-guided trades, while offering instant fiat spendability via global virtual and physical card

# MARKET OPPORTUNITY

As digital assets achieve mainstream status, a massive gap remains between holding crypto and spending it daily without friction. Furthermore, navigating volatile market structures prevents everyday users from trading successfully. The convergence of multi-chain liquidity, instant crypto-to-fiat conversion, and predictive AI trading assistance represents a multi-trillion-dollar frontier that \$AAIC is perfectly positioned to capture.

# CURRENT INDUSTRY PROBLEMS

Spending Friction: Converting crypto to local fiat currency for everyday purchases usually requires centralized exchanges, costly withdrawal fees, and multi-day settlement delays.

Complex Market Structures: Retail users struggle to read real-time market movements, order flows, and liquidity structures, leading to preventable trading losses.

Fragmented Multi-Chain UX: Managing assets across multiple blockchains typically demands hopping between confusing bridges, separate wallets, and risky dApps.

# AAIC SOLUTION

\$AAIC simplifies your entire crypto life into a single, high-performance portal.

Real-Time Fiat Conversion: Spend your crypto at any point-of-sale globally at precise, real-time market prices.

## AI Market & Structure

Intelligence: Let our built-in AI read complex market movements, map out structural shifts, and assist you in executing smarter, automated trades.

Unrivaled Multi-Functionality: One wallet, multi-chain access, instant virtual payment cards, and physical hardware integrations designed to work in absolute harmony.

# WHY BASE CHAIN!

\$AAIC is built on Base to deliver an institutional-grade core foundation.

Sub-Cent Execution Fees: Ensures that rapid-fire multi-chain swaps, wallet updates, and card authorizations remain micro-fractional in cost.

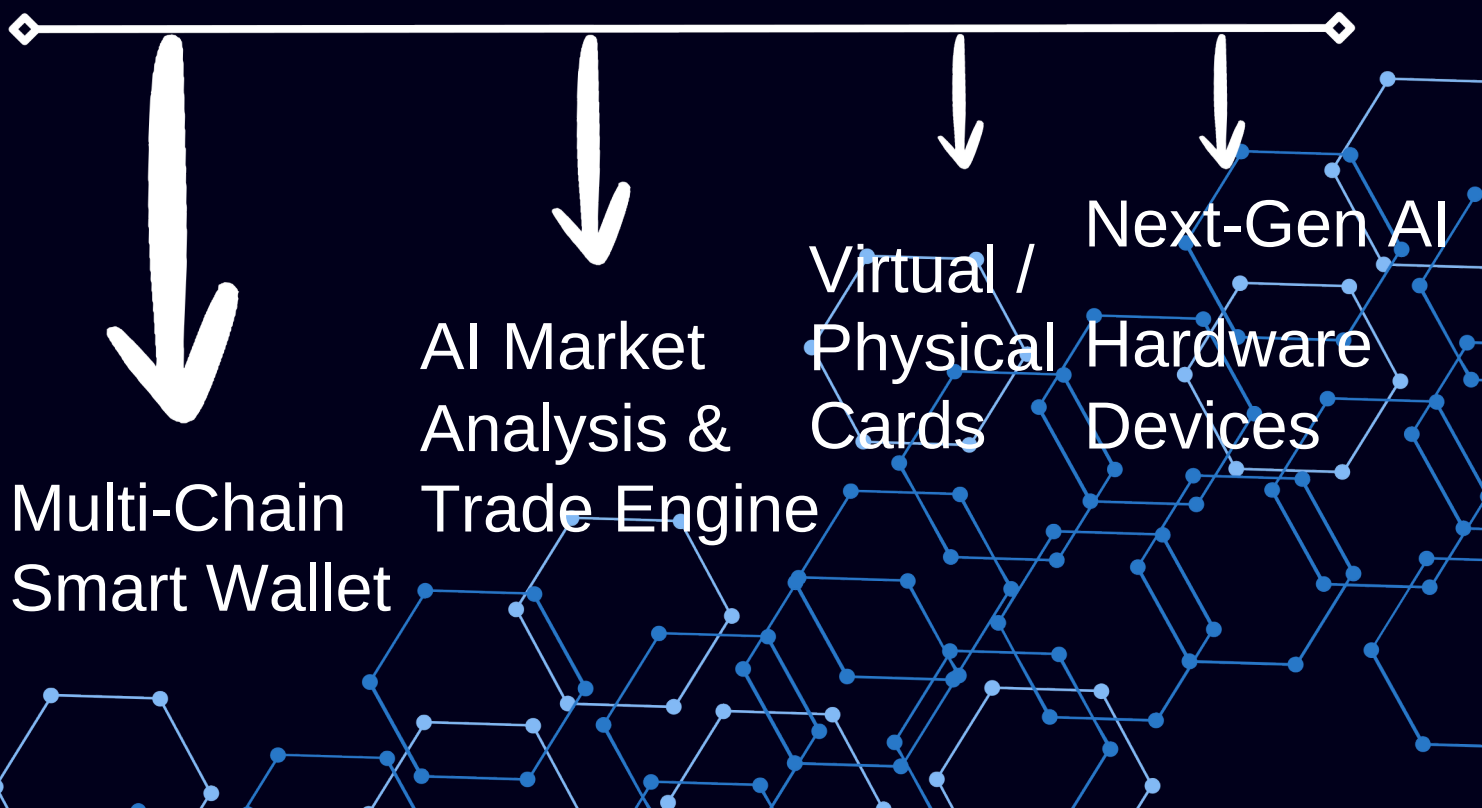

Coinbase  
Ecosystem  
Security: Backed by the robust security frameworks and deep liquidity pools connected directly to global financial on-ramps.

Blazing Speed:  
Optimized for real-time transaction processing, critical for instant point-of-sale card approvals

# AAIC ECOSYSTEM

The AAIC ecosystem is a unified, four-pillar framework designed to seamlessly bridge real-time AI intelligence, cross-chain crypto assets, and physical fiat payment rails. Instead of keeping your digital assets locked in isolated storage, the ecosystem establishes a direct loop between analyzing the markets, executing trades, and spending your capital in the real world.

The data flows across four foundational layers:

**Multi-Chain Smart Wallet:** The command center for your portfolio. It consolidates assets from various blockchain networks into a singular dashboard, serving as the fluid liquidity pool that backs your daily spending.

**AI Market Analysis & Trade Engine:** The brain of the operation. This engine feeds live market structures and automated trading capabilities directly into your wallet interface, helping you grow and protect your capital using machine intelligence.

**Virtual / Physical Cards:** The immediate bridge to everyday utility. By linking directly to your wallet balance, it enables instant conversion to local fiat at precise, real-time prices whenever you tap online or in physical stores.

**Next-Gen AI Hardware Devices:** The ultimate physical security and utility layer. Arriving on the roadmap for 2027, this portable cold-storage device brings your keys completely offline while maintaining localized AI access for secure, on-the-go trading approval.

# AAIC MULTIFUNCTION WALLET OVERVIEW

The AAIC Smart Wallet is a next-generation, multi-chain hub built to eliminate blockchain borders. It aggregates your portfolios across multiple networks into a clean, unified dashboard. It isn't just for holding; it is equipped with real-time conversion rails that allow you to treat your crypto balance as stable local fiat whenever you make a purchase.

**Instant Virtual Cards:** Issue a virtual prepaid Mastercard directly inside the app within seconds to securely shop online globally.

# AI LAYER & SMART TRADING FEATURES

Real-Time Market Decoding: The embedded AI constantly monitors the order books and candlestick structures across major chains, breaking down complex trends into plain text.

Structural AI Trading: Detects key market structure breaks, liquidity sweeps, and momentum shifts, allowing you to copy-trade or fully automate your execution using AI guardrails.

Adaptive Security Scanning: Dynamically screens cross-chain contracts before you interact, instantly blocking malicious drainers or honeypots.

# TOKEN UTILITY

The \$AAIC token powers every layer of this unified network.

Premium Trading Features: Unlock institutional-grade AI market signals, automated algorithmic bots, and deeper structural insights.

Card Cashback & Perks: Tiered staking unlocks reduced transaction fees, higher spending limits, and crypto cashback on card transactions.

Network Settlement: Acts as the base currency for rapid cross-chain routing and node validation operations.

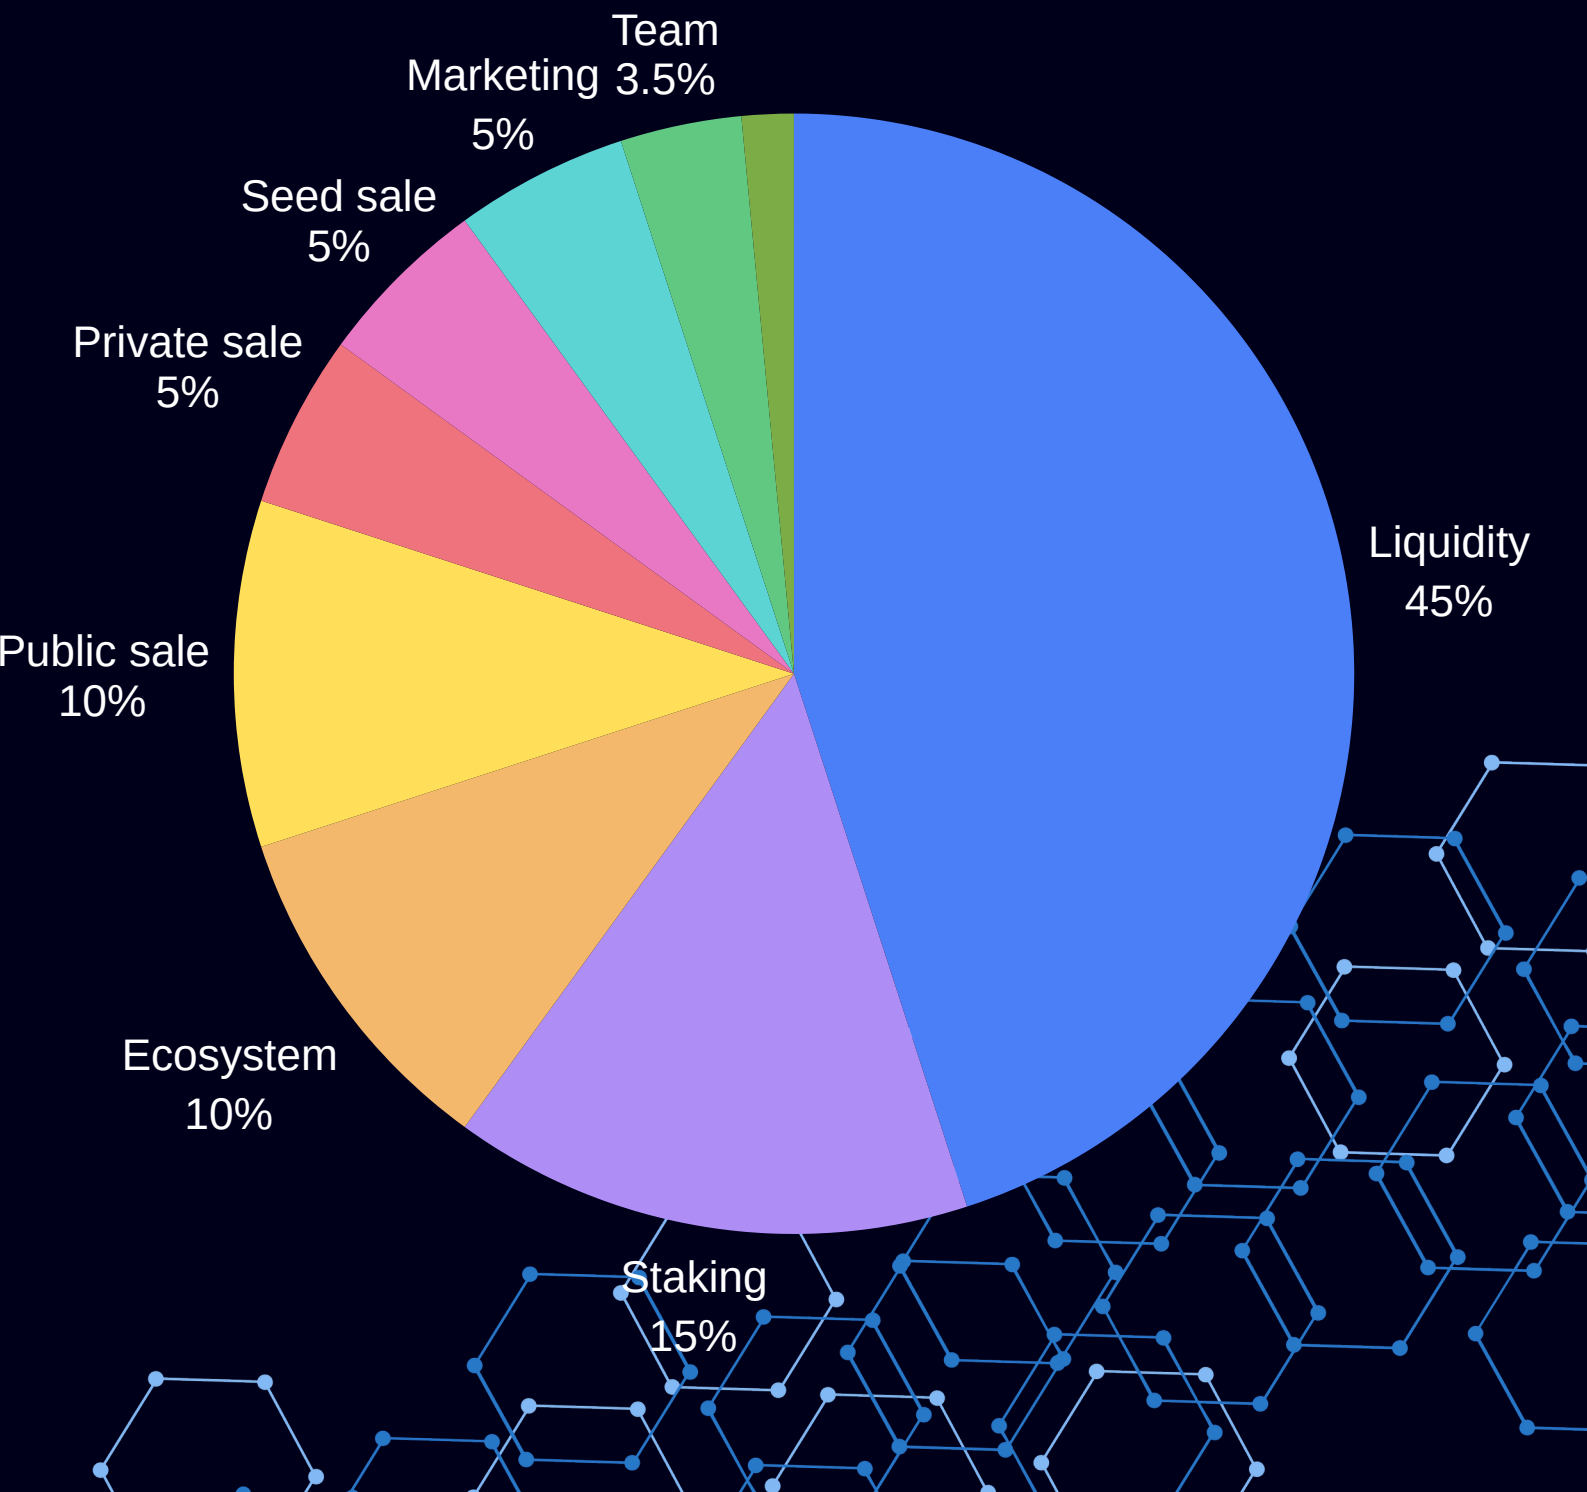

# TOKENOMICS

TOKEN NAME : AGENT AI CASH

SYMBOL : AAIC

Total Supply : 3,000,000,000 (3  
BILLION)

BLOCKCHAIN : BASE

# VESTING SCHEDULE

## Key Protection Frameworks

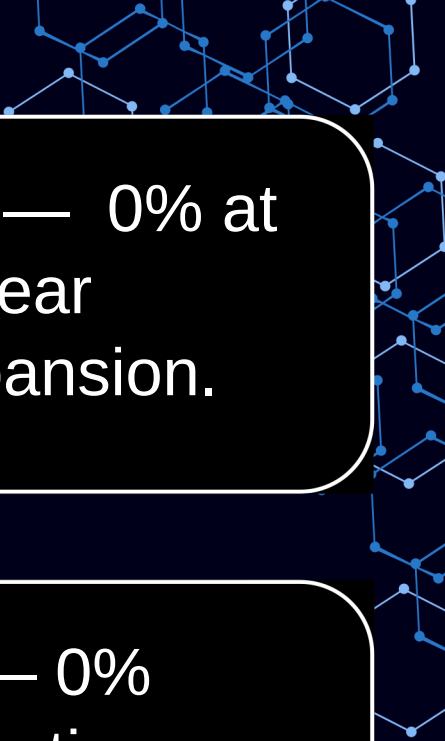

Liquidity Stability: 45% — All tokens (1.35B \$AAIC) are deployed immediately at TGE to solidify market health, containing 150M for initial pool pairing and a 1.2B permanently locked treasury.

Marketing: 5% — 10% at TGE, 1-Month cliff, 12 Month linear monthly vesting

Seed Round: 5% — at TGE, 3-month cliff, 12-month linear monthly vesting.

Private / KOL: 05% — at TGE, 2-month cliff, 9-month linear monthly vesting.

Public Sale: 10% — 50% at TGE, 0-month cliff, 3-month linear monthly vesting.

Ecosystem & AI Dev Fund: 10% — 0% at TGE, 1- month cliff, 24-month linear vesting for API infrastructure expansion.

Staking & Node Rewards: 15% — 0% at TGE, dynamic emission distributions calibrated to active stakers and active node runners over a 36-month timeline.

Marketing Team: 1.5% — 0% at TGE, 0-month cliff, 12-month linear monthly vesting for continuous growth initiatives.

Core Team Member: 3.5% — 0% at TGE, strict 6-month cliff, 24-month linear vesting to maintain complete ecosystem alignment.

# REVENUE MODEL

Card Transaction Processing: Tiny Interchange fees generated through global virtual and physical card point-of-sale spending.

Hardware Retail & Licensing: Direct sales of our proprietary physical AI hardware cold storage devices.

AI Premium Trading Tier: Monthly subscription tiers for enterprise-grade real-time market structure tracking and autonomous trade bots.

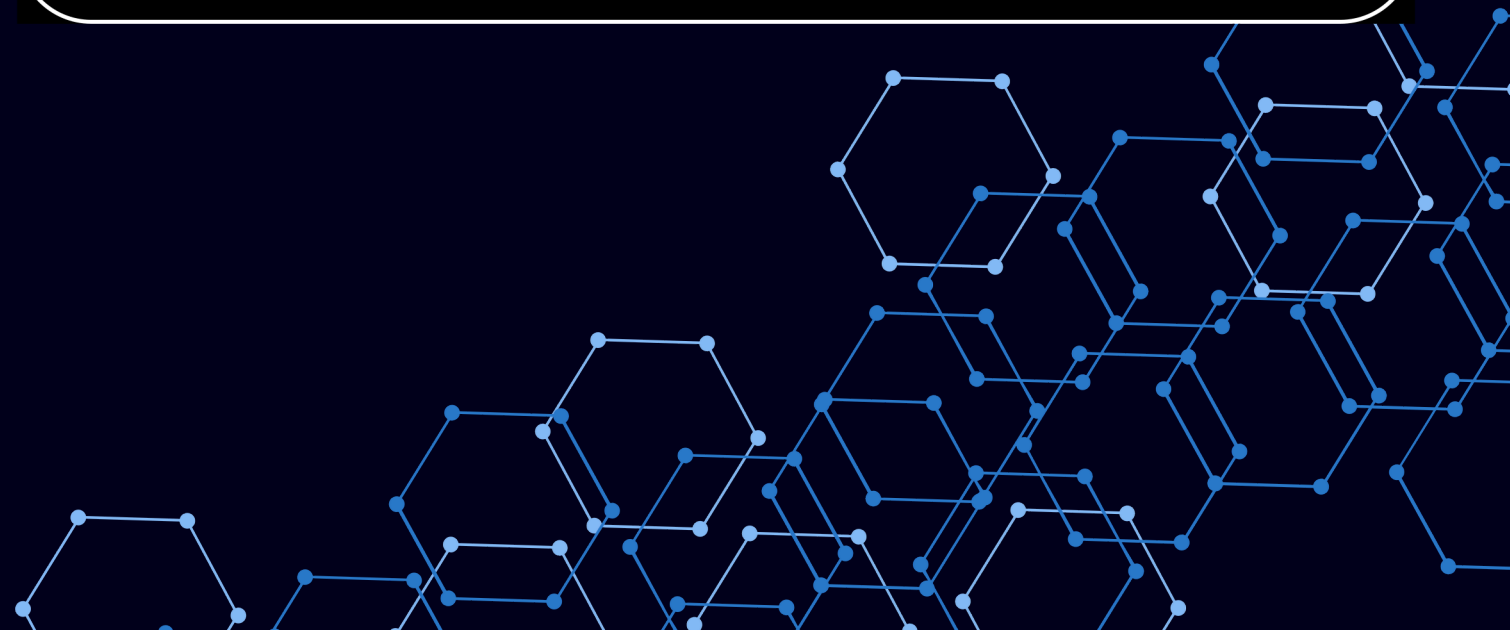

# STAKING & NODE REWARDS

Users can lock up \$AAIC to clear fee brackets, earn passive yield, or run automated validation nodes that power the multi-chain payment matching engines. 450,000,000 tokens are dedicated to reward top network nodes based on overall uptime and processing speed.

# STRATEGIC PARTNERSHIPS

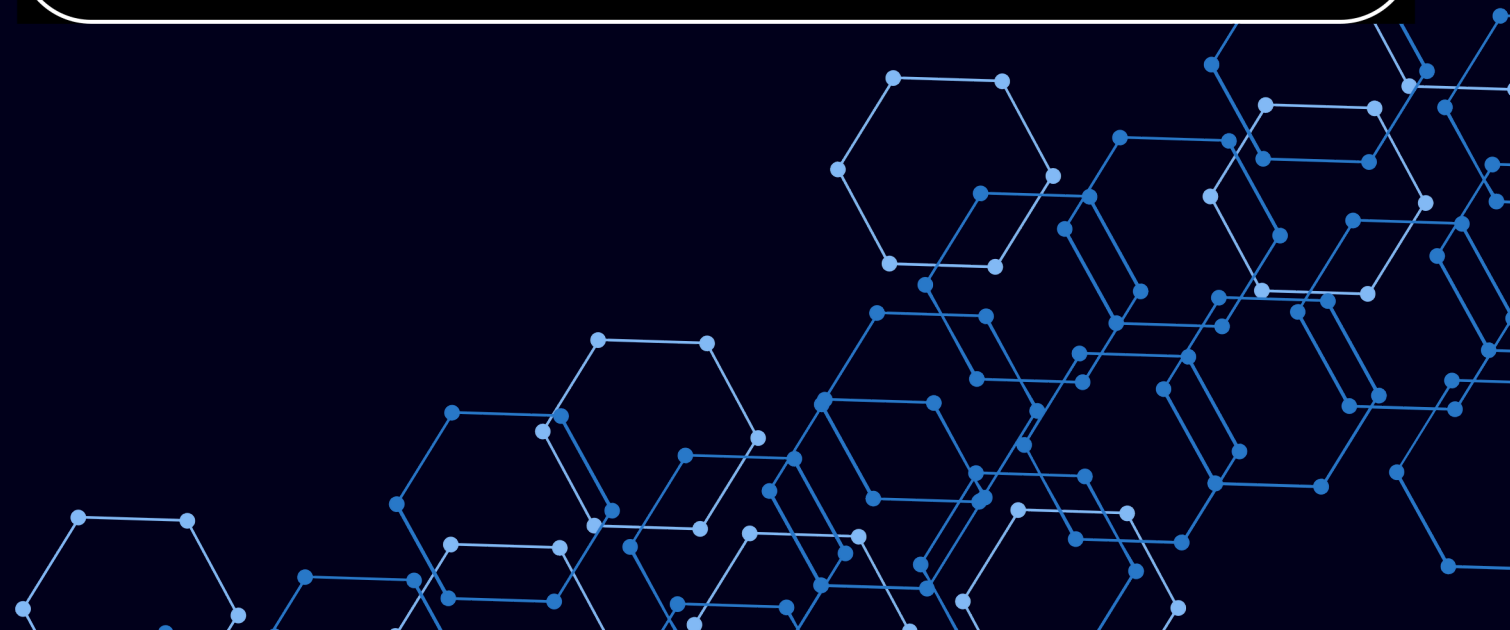

We work in lockstep with secure banking-as-a-service providers, card networks, and deep learning developers to guarantee our hardware and card components function seamlessly across international borders.

# FUTURE EXPANSION

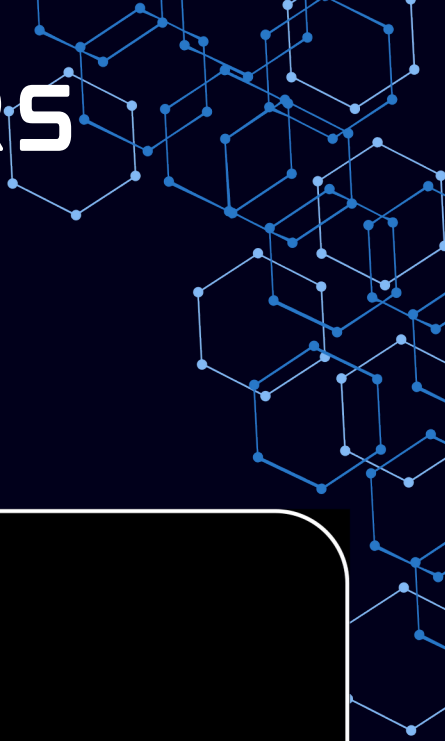

As our AI engines mature, the ecosystem will expand to support fully autonomous AI-managed mutual index funds, decentralized merchant plug-ins for small businesses, and voice-activated hardware transaction authentication.

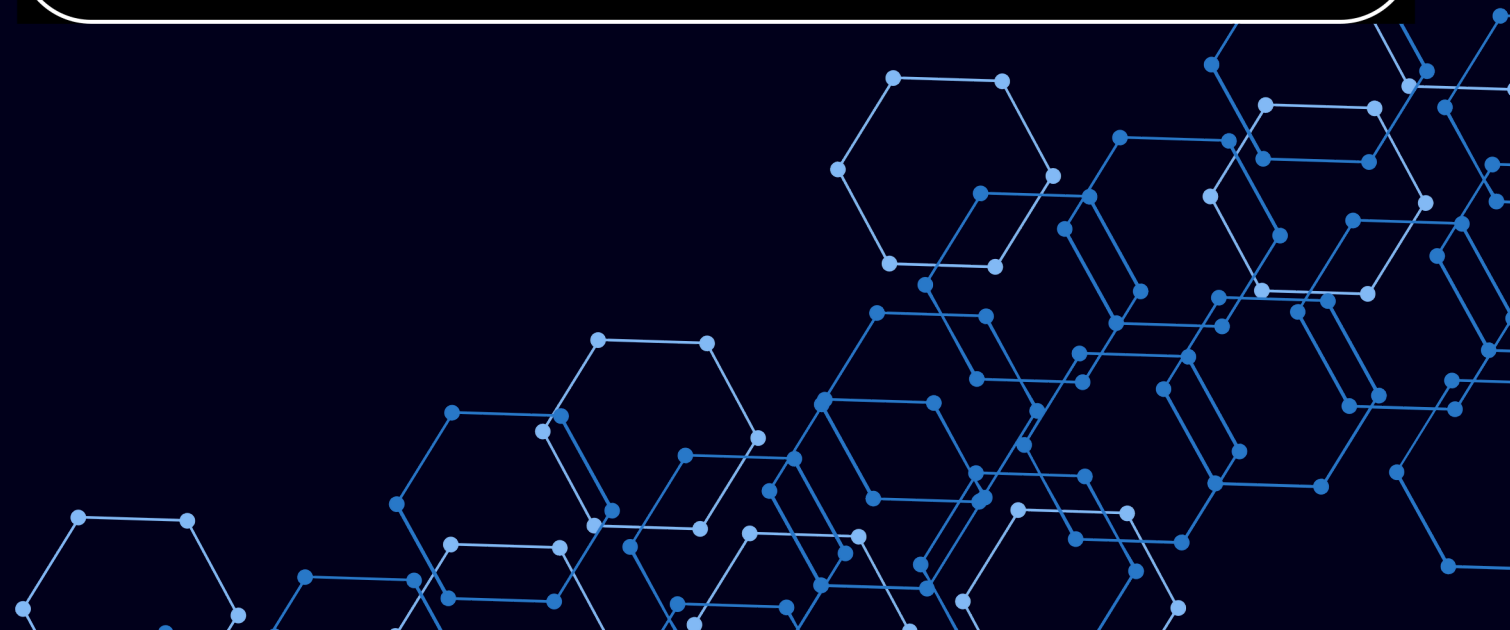

# TEAM & ADVISORS

Formed by seasoned systems architects, cybersecurity hardware veterans, and machine learning researchers dedicated to building durable crypto products that solve tangible, real-world utility problems.

# CONCLUSION

Agent AI Cash (\$AAIC) cleanly eliminates the wall standing between digital asset trading and daily commerce. By joining forces with a flexible multi-chain design, advanced market structure AI, and an aggressive 2027 hardware and physical card rollout, \$AAIC is ready to anchor itself as the everyday financial hub for the decentralized age.
